1. What This Guide Covers

This guide walks through the public side of TRAMA from the perspective of someone using the site. It shows what a visitor can find, which features are available to a registered account, and what changes on screen after each action. Internal details about classes, the database, and processes are covered in the technical documentation.

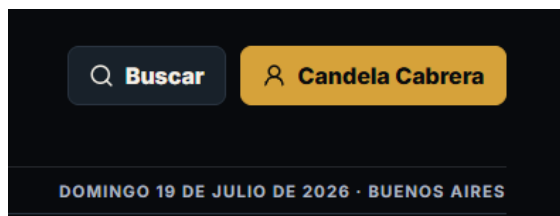

- Visitor: can read articles, browse sections, search for content, open journalist profiles, and view informational pages.
- Registered user: can also comment, reply, Like comments, report comments, and review their own contributions.
- Journalist and editor: within the public portal, they can reply to comments according to their permissions. The administrator does not take part in the public conversation.

2. Portal Header and Navigation

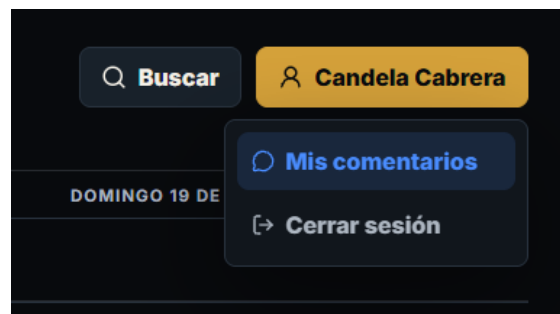

The portal pages share a common header. From there, users can return to the homepage, open a section, search for articles, access their account, and view the top advertising banner. Sign-in, registration, verification, and password-reset screens use a simpler layout focused on the account.

Common portal header: TRAMA identity, banner, search, account, date, and sections.

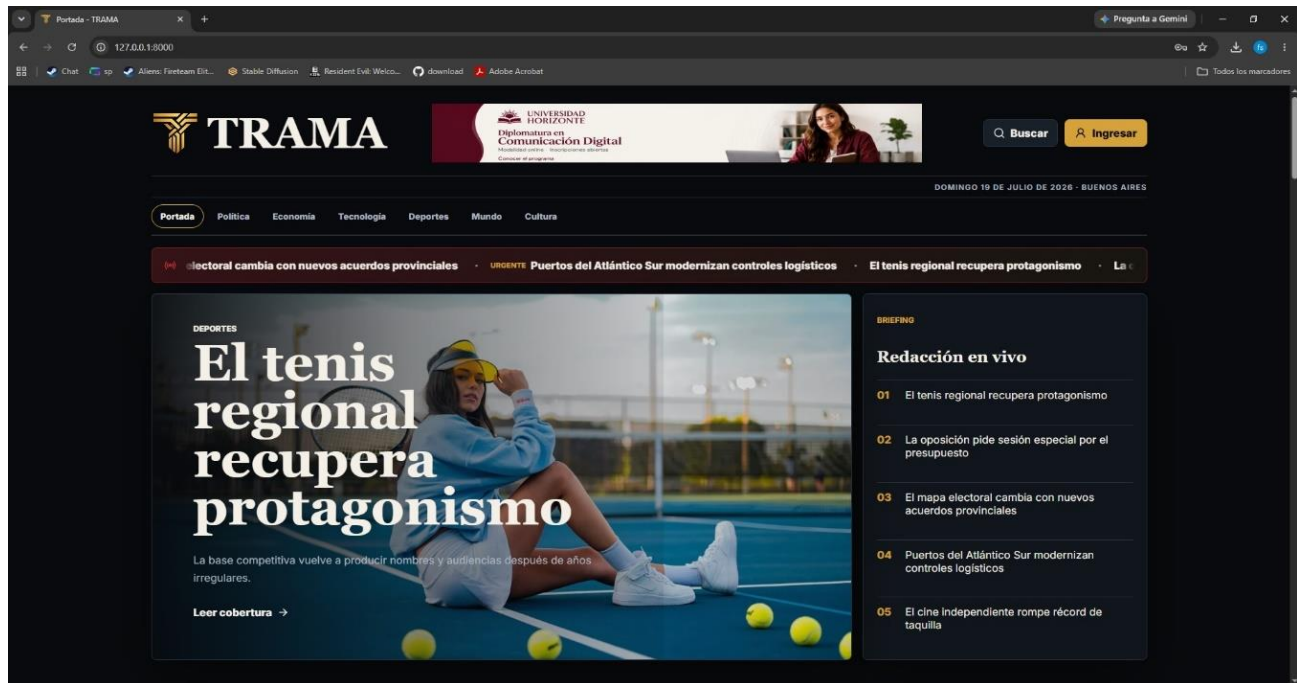

Account identified in the header.

Registered-account menu.

3. Homepage

The homepage is the entry point to the portal. At the top, a large lead story appears next to the Live Newsroom block. Above the lead story, a headline ticker scrolls horizontally and provides quick access to other articles.

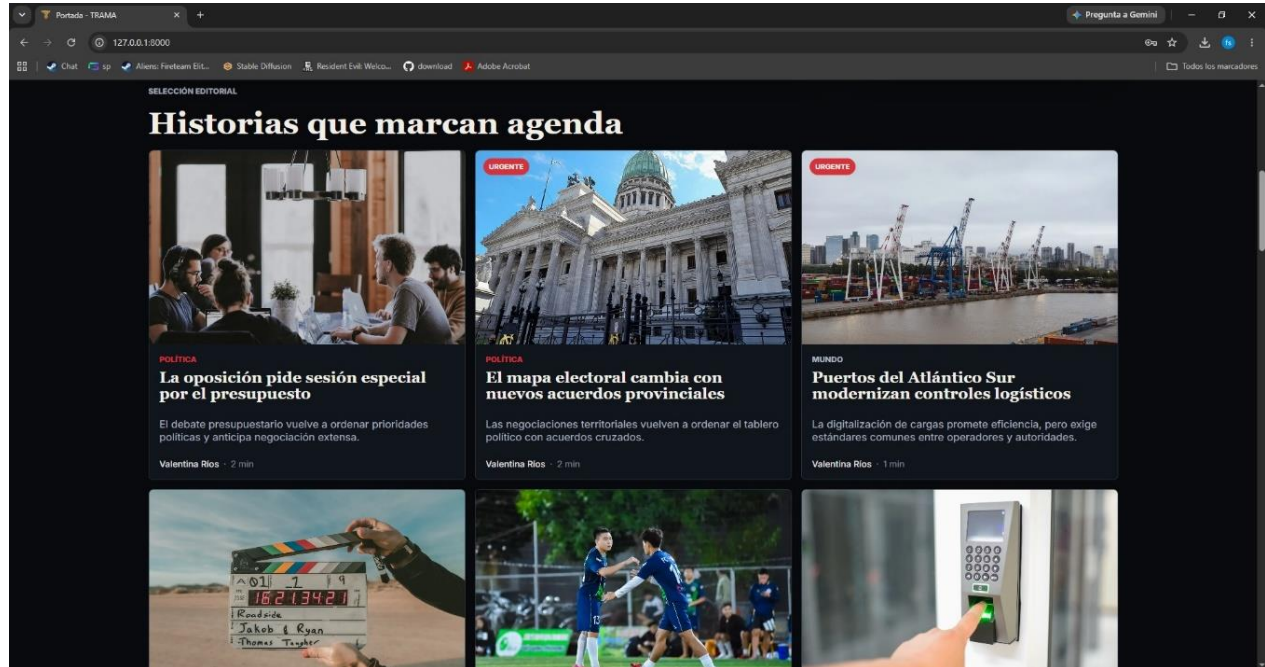

Initial view of the public homepage.

On this first screen, users can identify:

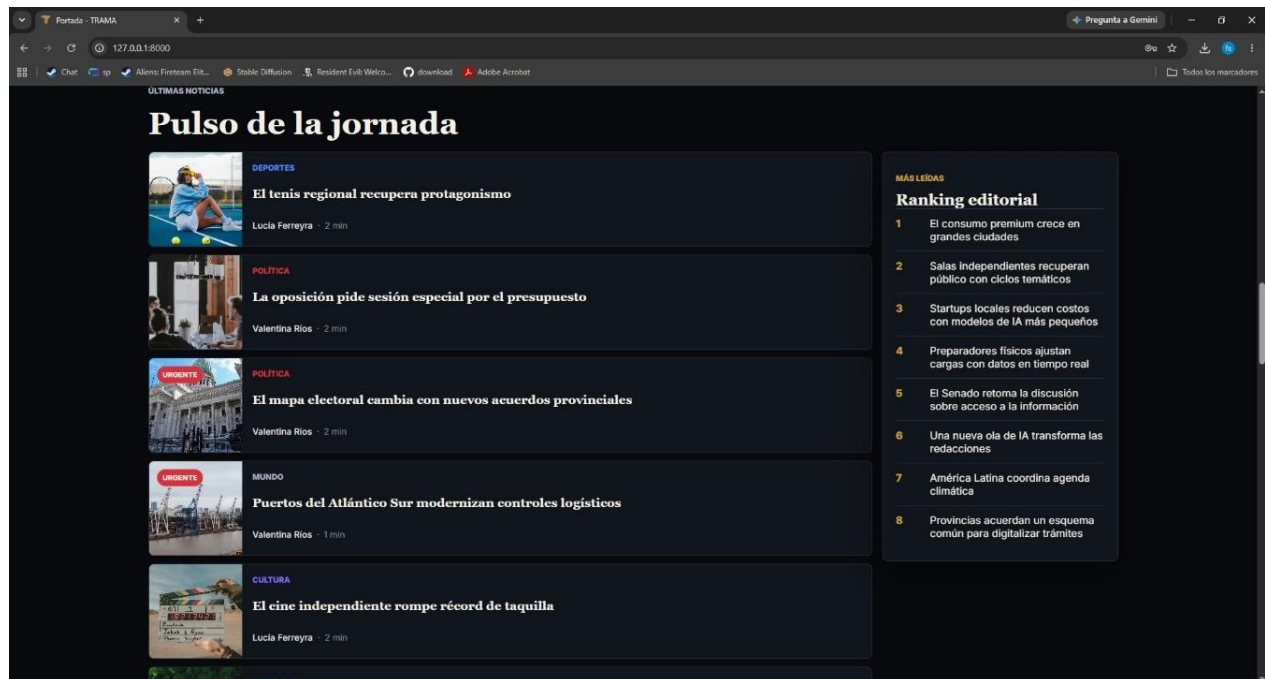

- lead story and the “Read Full Coverage” link;
- Live Newsroom with a short selection of headlines;
- horizontal news ticker;
- permanent links to sections, search, and account access.

Blocks That Appear Further Down

The homepage is not limited to the lead story. As users scroll down, current news is presented in different formats: grids, lists, rankings, and blocks grouped by topic.

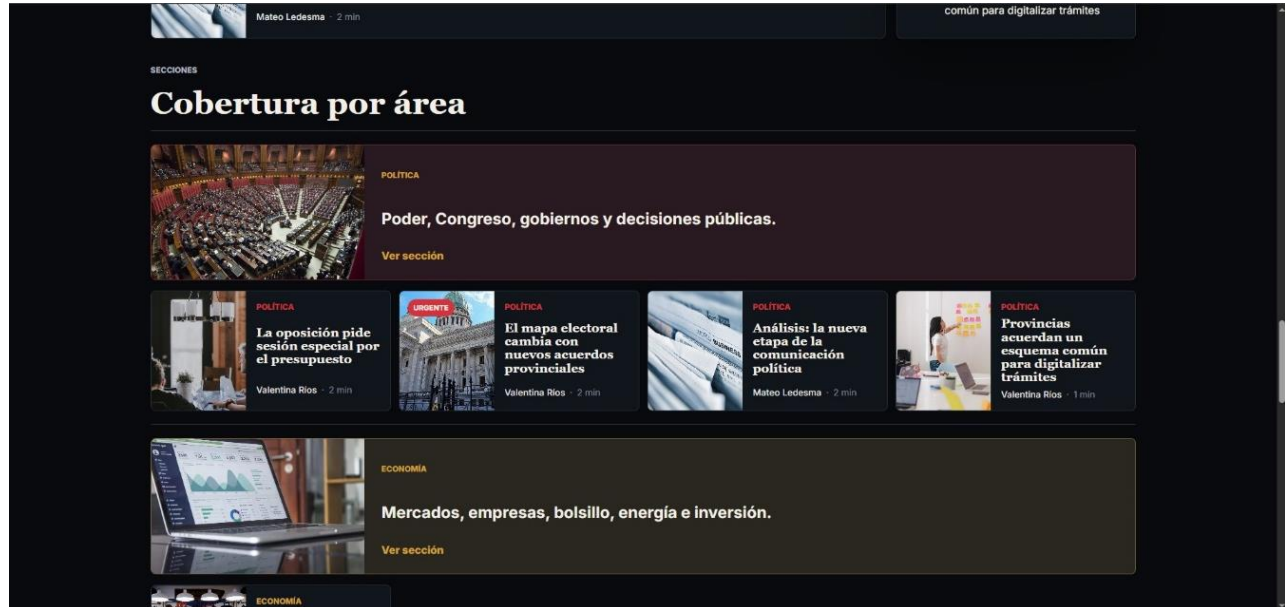

Stories Shaping the Agenda and other news blocks.

Pulse of the Day and Editorial Ranking.

Coverage by Topic

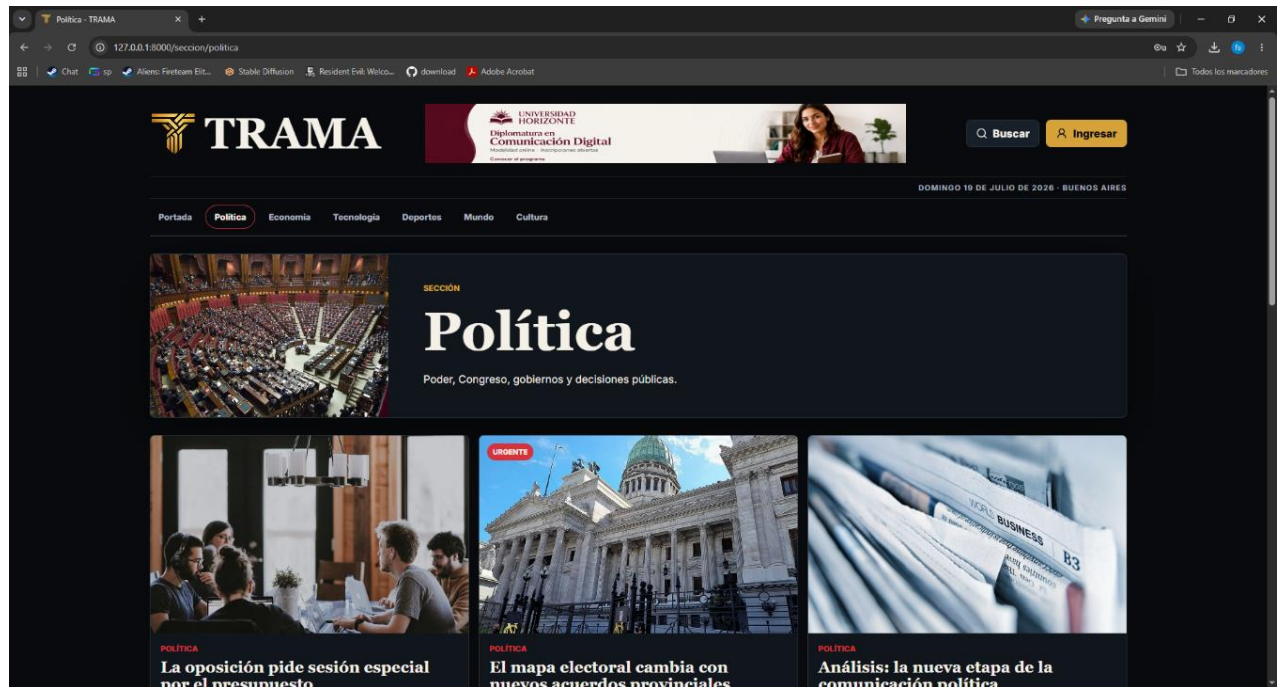

Further down, Coverage by Topic groups articles by subject and provides direct links to each section. The homepage combines grids, lists, rankings, and topic-based blocks so navigation does not depend on a single list.

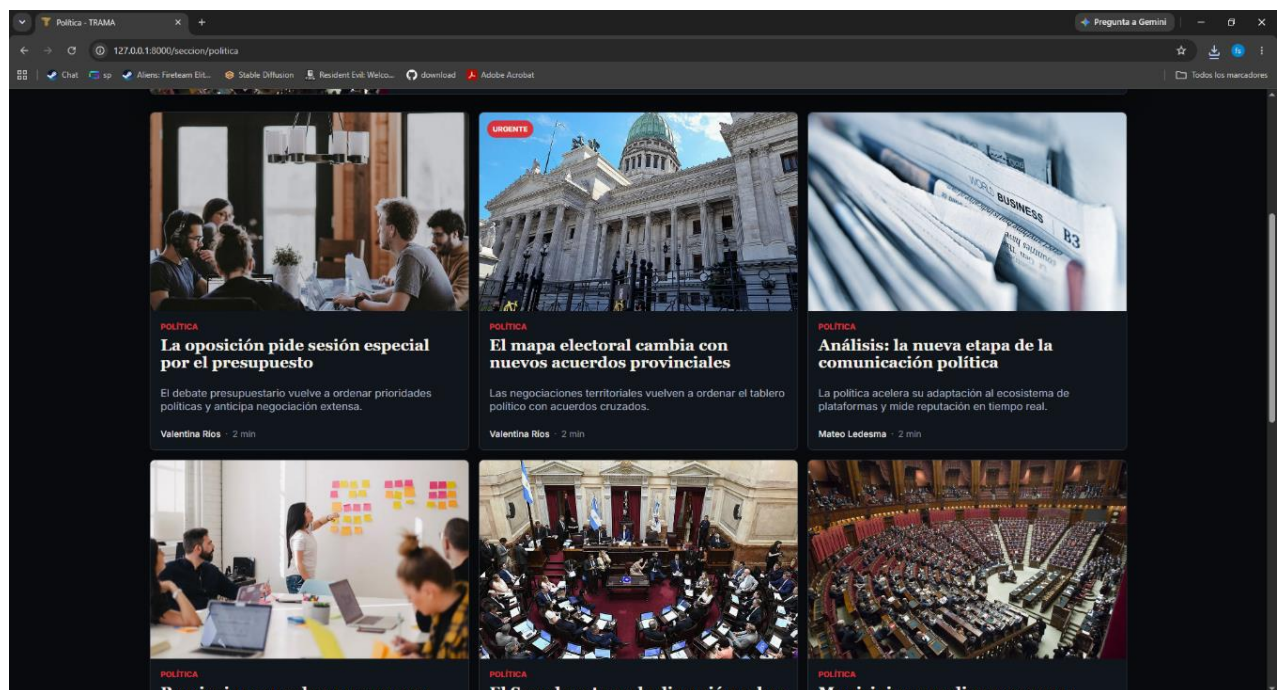

Coverage by Topic on the homepage.

4. News Sections and Pagination

Sections group articles from the same category. Politics, Economy, Technology, Sports, World, and Culture all share the same general structure: a section header and an article grid.

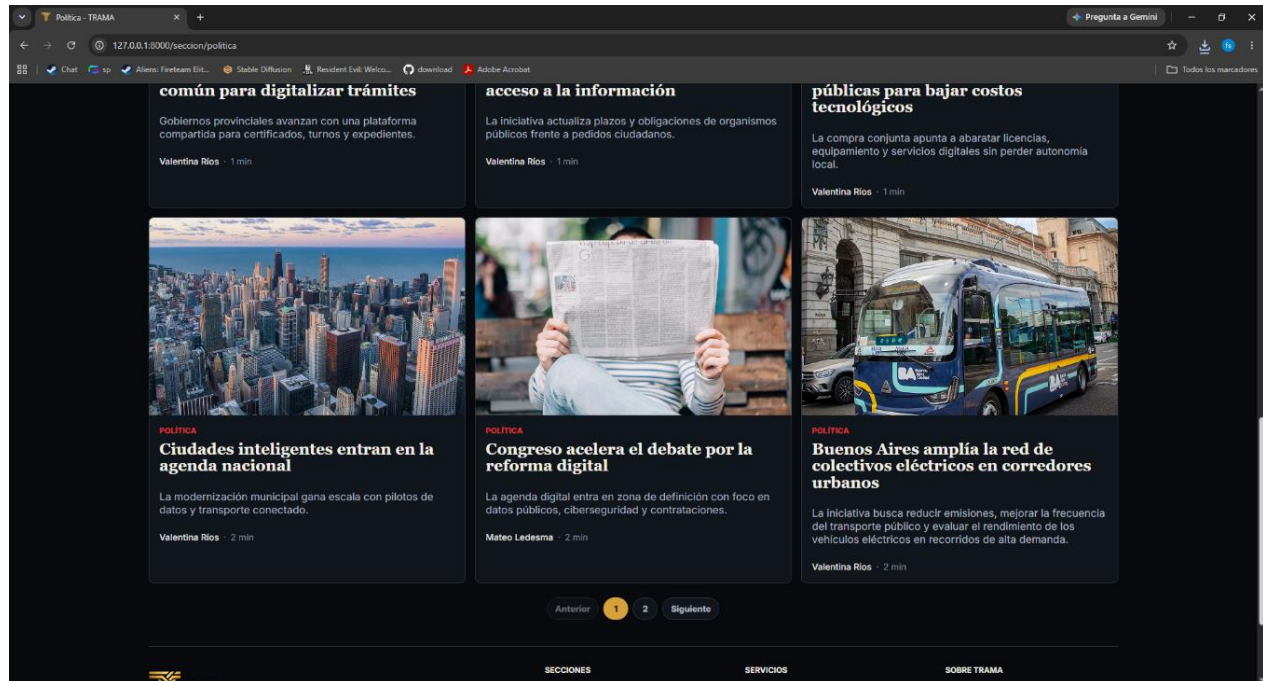

Politics section.

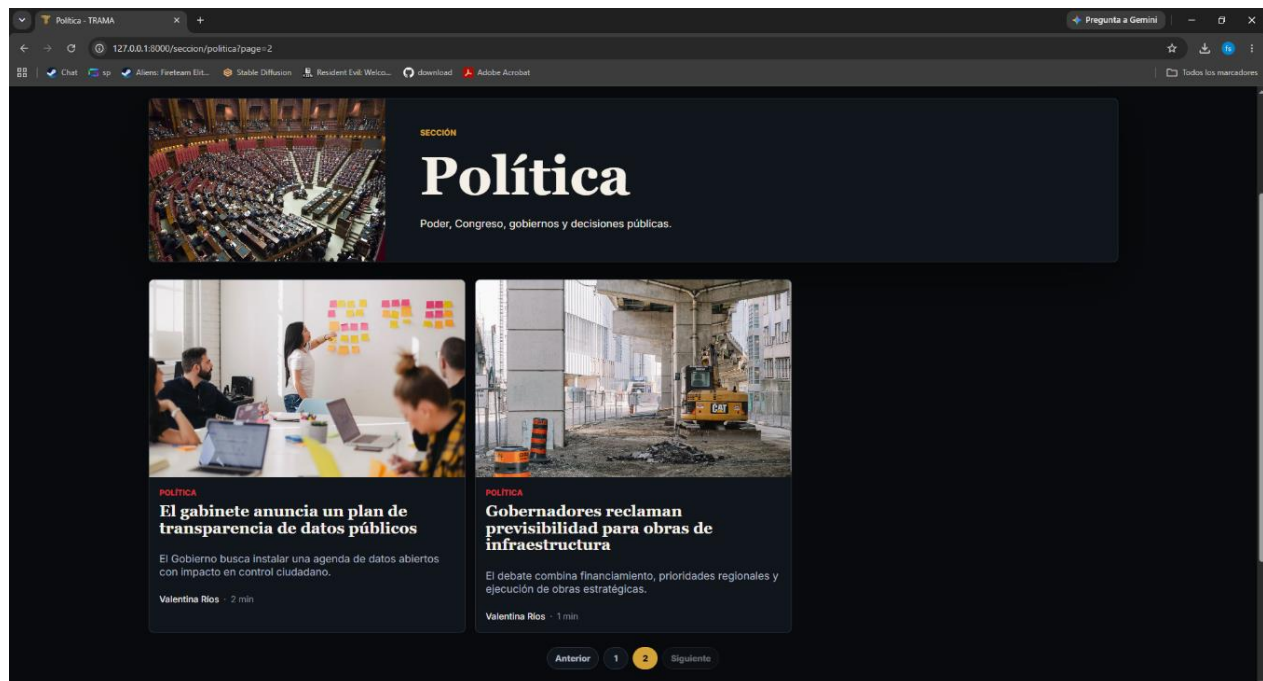

Continuation of the grid within the same section.

Section Pagination

When a section contains more articles than fit on one page, TRAMA displays 9 articles per page. Page numbers and controls for moving forward or back appear at the bottom.

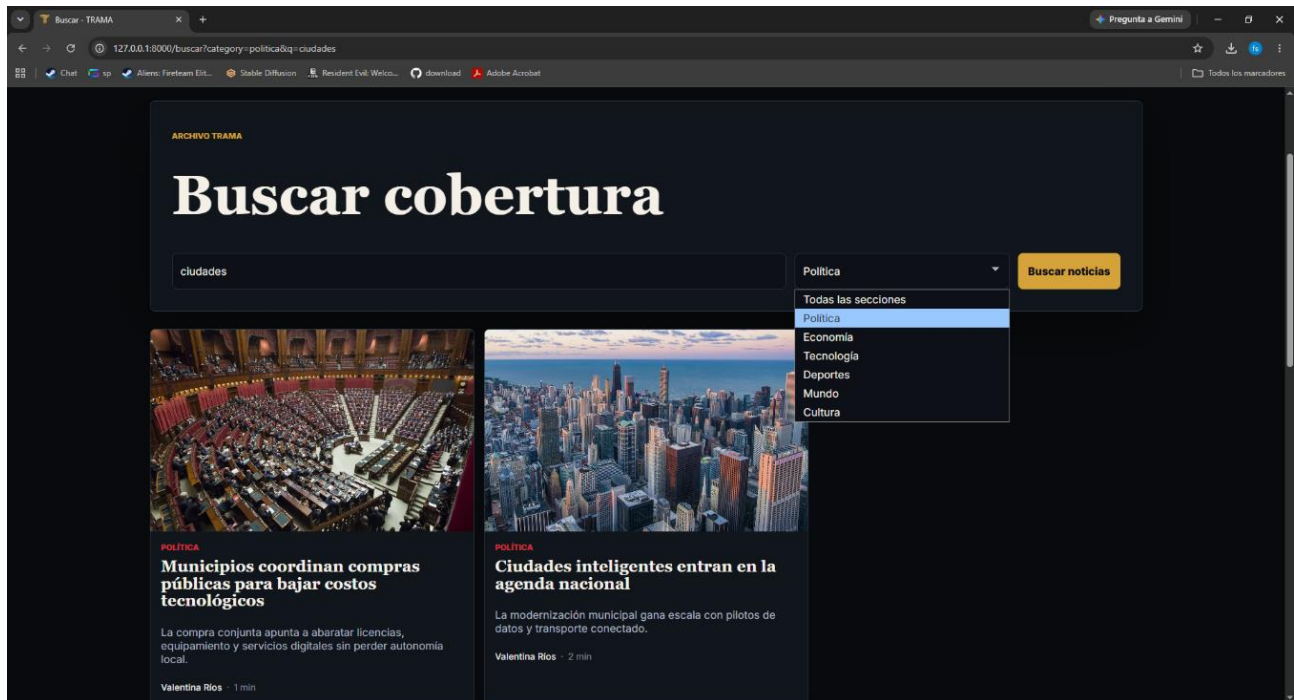

End of the first page with pagination controls.

Second page of the section.

5. Searching for News

The public search lets users enter text and, optionally, limit results to a category. Results are displayed as article cards and retain pagination when there are more matches.

Public search and results screen.

What Visitors Can Search For

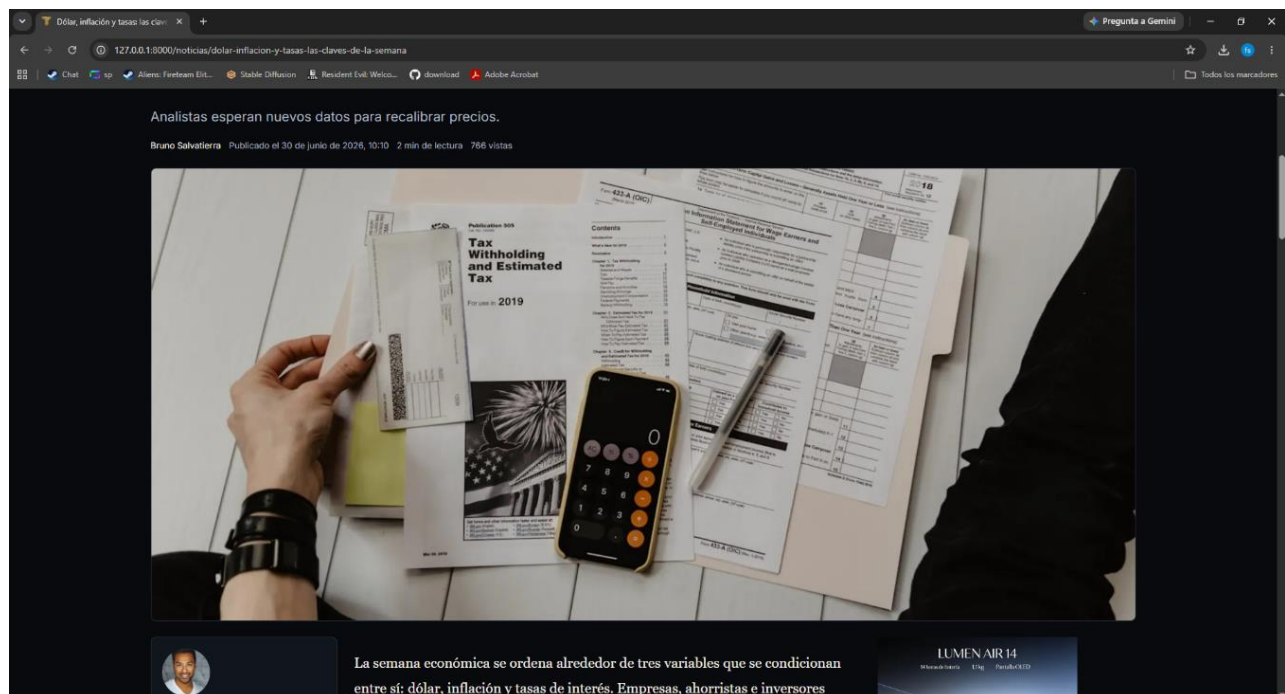

TRAMA compares the entered text with the title, subheading, summary, category, and tags of published articles. The full article body is not searched, preventing unhelpful matches caused by isolated words. Results are sorted by publication date, from newest to oldest.

6. Article Page

Selecting an article opens its full page. The upper section contains the information needed to identify the article before reading begins.

Top section of an article page.

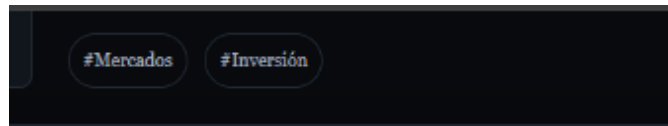

Main article image.

Continuing the Article

Scrolling down reveals the full article body. The journalist's public profile card and side advertising spaces appear alongside the text. The author card links to the journalist's profile.

Article body, journalist profile card, and side advertising.

Tags associated with the article.

After the Article Body

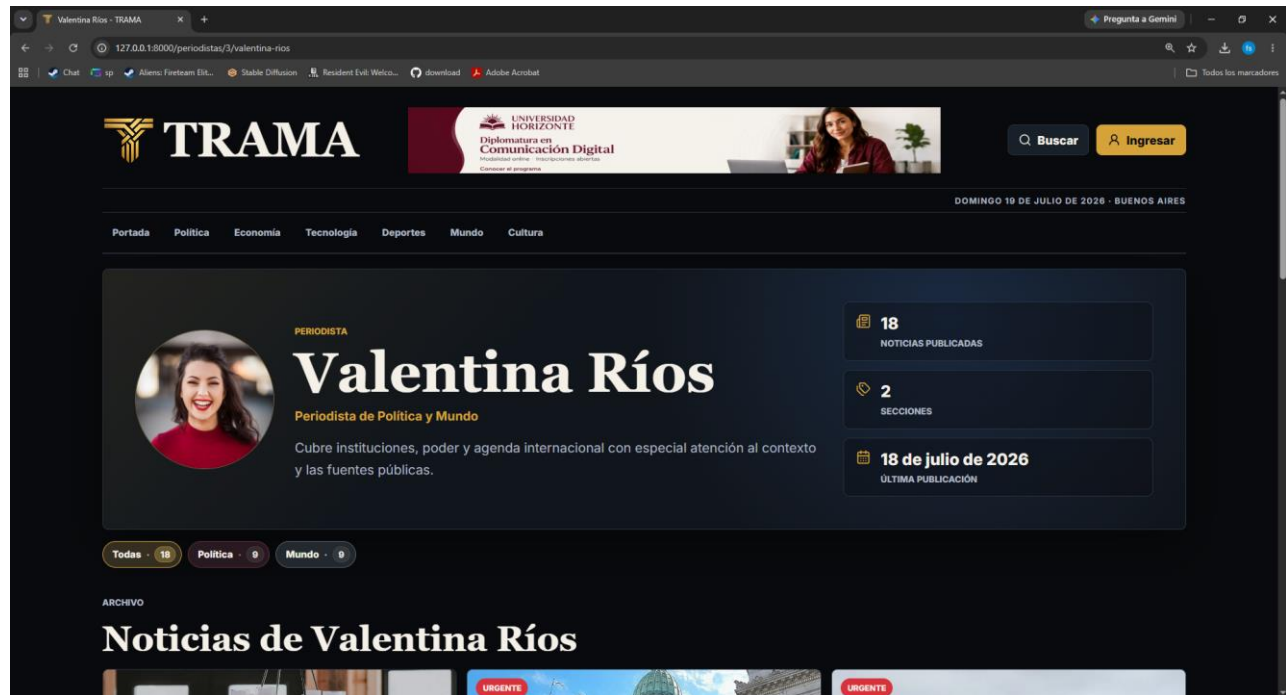

Tags help identify topics associated with the article.

The “Keep Reading” block suggests 3 related articles to continue browsing.

The comments conversation appears next.

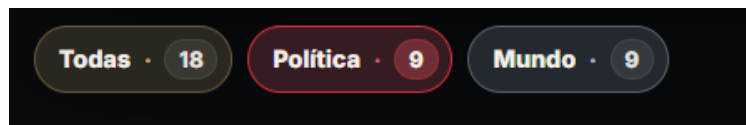

7. Journalist's Public Profile

The author card on an article provides access to the journalist's profile. It displays public information, selected metrics, and an archive of the articles they have published.

Public profile of a journalist.

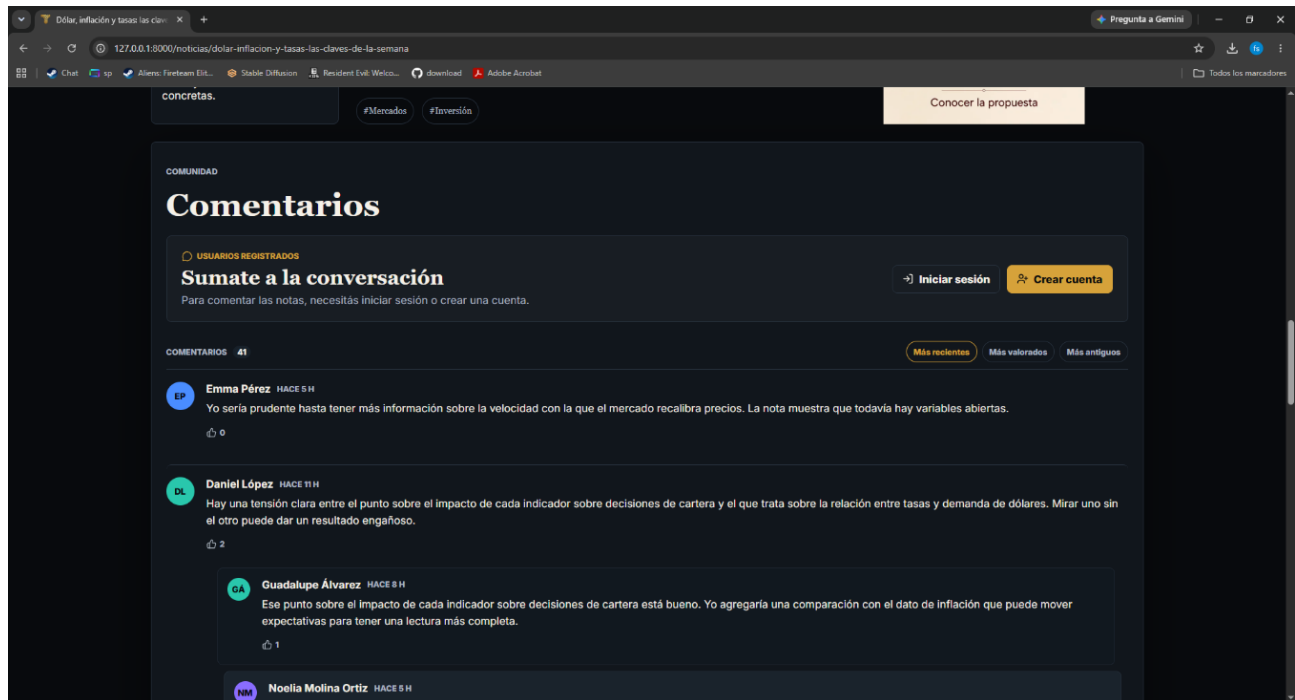

Articles on the profile are displayed in a grid of 9 per page. Pagination controls appear when there are enough published articles. The archive can also be filtered by category.

Category filters within the profile.

8. Comments and Participation

The conversation appears at the end of each article. A visitor who is not signed in can read comments, but must sign in or create an account to participate.

Comments visible to a visitor who is not signed in.

The conversation can be sorted by Most Recent, Top Rated, or Oldest. This selection changes the order of top-level comments without changing their content.

SIGN IN OR CREATE AN ACCOUNT

REGISTERED USER CAN PARTICIPATE

8.1 Writing and Submitting a Comment

A registered account has a text box with a character counter. Each top-level comment or reply can contain up to 1,200 characters. After the user selects Submit Comment, the interface first indicates that the operation is in progress and then reports that the content is being reviewed.

The button changes to “Submitting...” while the contribution is being saved.

COMUNIDAD

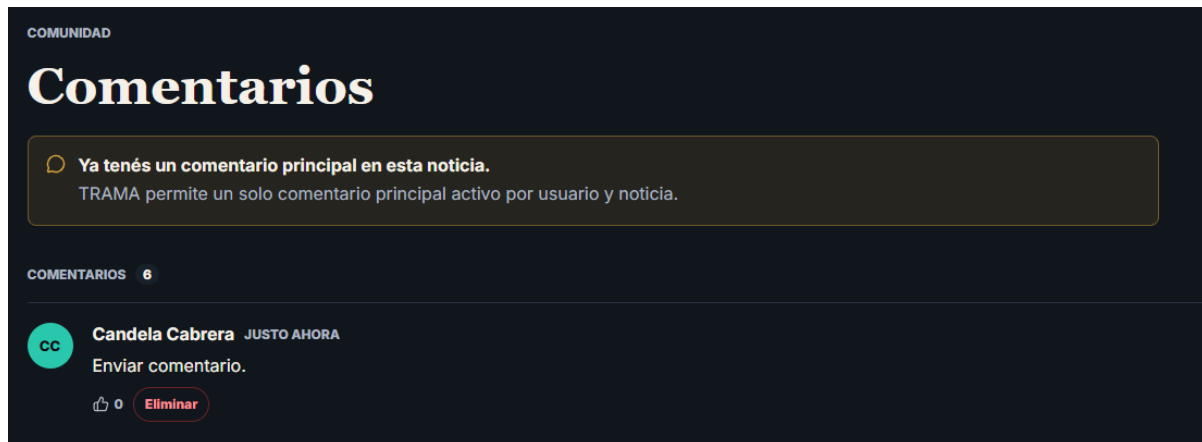

Comentarios

Comentario recibido.
Estamos revisándolo antes de publicarlo.

Message displayed while TRAMA reviews the comment.

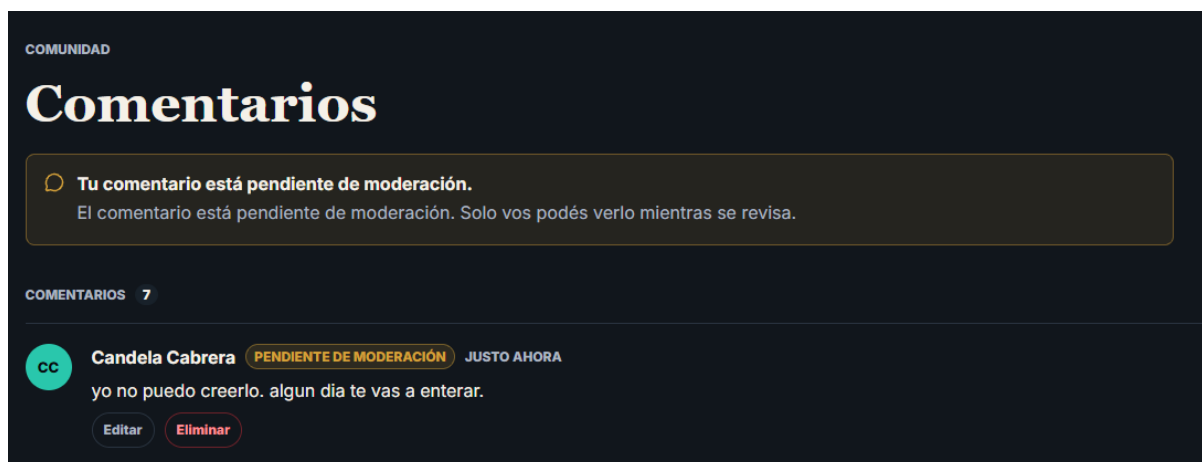

8.2 Published or Pending

When the review is complete, the interface updates without requiring the user to manually reload the entire article.

Approved comment visible in the conversation.

If the system cannot make a sufficiently confident decision, the comment remains Pending. In that state, only its author can see it while it awaits human review. While a top-level comment is Under Review, Pending, or Published, that account cannot create a second top-level comment on the same article.

Comment pending moderation.

8.3 Rejecting, Editing, or Deleting a Contribution

If the review detects a clear violation, the comment is not published and the interface displays a general rejection message. Only a contribution that is Pending can be edited through this flow; after the changes are saved, it is reviewed again from the beginning. A contribution that is already Published or Rejected cannot be edited here.

The screenshot shows the 'COMUNIDAD' (Community) section with the title 'Comentarios'. Below the title, it says 'COMENTANDO COMO Candela Cabrera'. There is a text input field with the placeholder 'Escribi tu comentario' and a character count '0/1200 caracteres'. Below the input field, it says 'Gracias por participar con respeto.' and there is a button 'Enviar comentario'. At the bottom, a red message box states: 'Tu comentario no pudo publicarse porque incumple las normas de participación.'

Automatic rejection message.

Users can also delete their own contribution. Before doing so, TRAMA asks for confirmation. If a top-level comment with replies is deleted, those associated replies are no longer displayed with it.

The screenshot shows the 'COMUNIDAD' (Community) section with the title 'Comentarios'. Below the title, there is a warning message: 'Ya tenés un comentario principal en esta noticia. TRAMA permite un solo comentario principal activo por usuario y noticia.' Below this, there is a list of comments. The first comment is by 'Candela Cabrera' with the text 'Enviar comentario.' and a red 'Eliminar' button. The second comment is by 'Rafael Guerrero' with the text 'Me quedó una duda con la parte dedicada al costo de ampliar capacidad sin quedar atado a un solo proveedor. ¿Hay información adicional sobre ese aspecto en la carrera por capacidad de cómputo?' and buttons for 'Responder' and 'Reportar'. A red confirmation dialog box is overlaid on the comments, asking '¿Eliminar este comentario?' and stating 'Esta acción no se puede deshacer.' with 'Cancelar' and 'Eliminar' buttons.

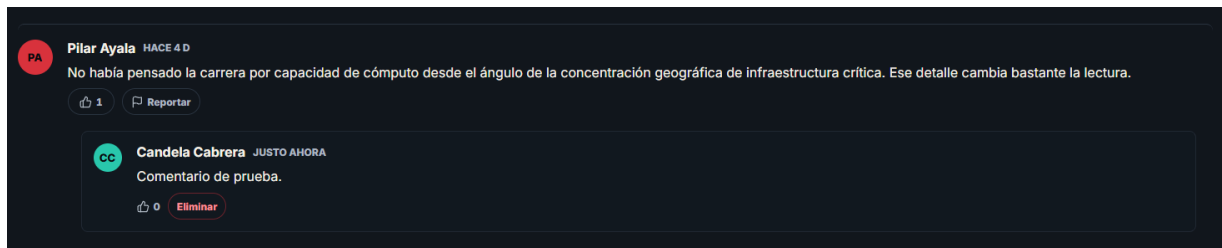

Confirmation before deleting your own comment.

8.4 Replies and Navigation Within the Conversation

A user can reply to other people's top-level comments. They cannot reply to their own top-level comment, and replies cannot have replies: TRAMA maintains a single level of nesting.

Writing a reply.

Approved reply within the conversation.

Progressive Conversation Loading

When an article is opened, TRAMA loads up to 10 top-level comments.

Up to 3 replies are initially displayed for each top-level comment.

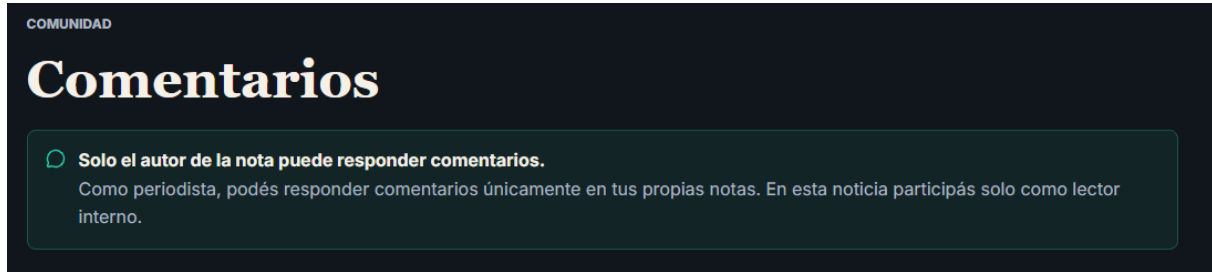

If more comments remain, the “View More Comments” control appears.

When a conversation has additional replies, “View the Remaining X Replies” appears.

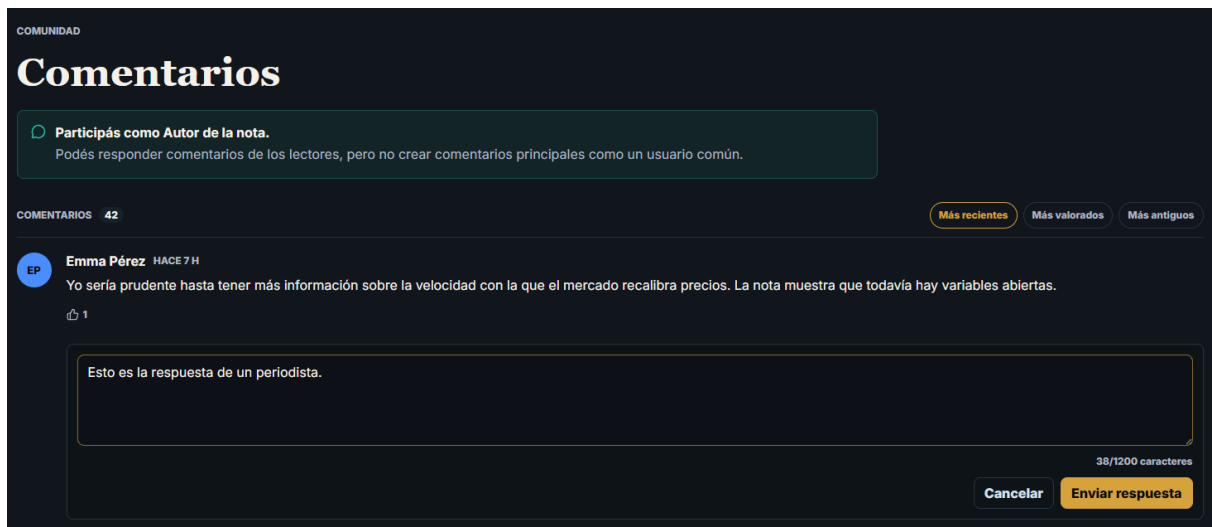

Each user can keep one active reply per top-level comment written by someone else.

8.5 Editorial Team Replies

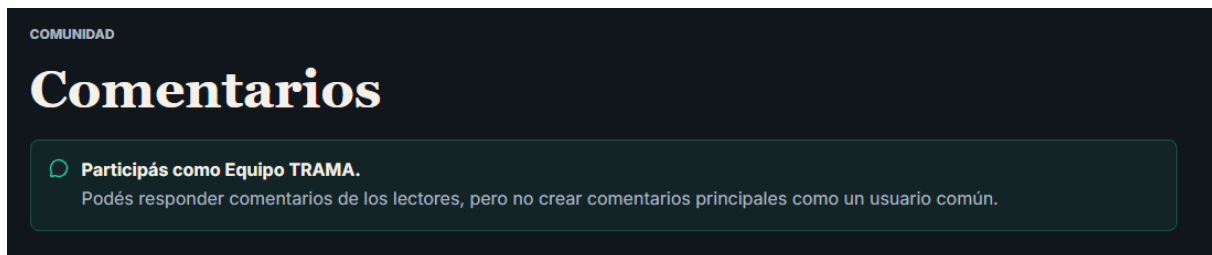

Editorial team members do not participate in the same way as a regular account. Their permissions depend on their role and their relationship to the article.

A journalist cannot reply to comments on someone else's article.

The article's author can reply to readers.

The editor can participate as the TRAMA Team.

Authorized replies from the journalist and editor appear directly as team replies. The administrator does not write comments or replies on the public portal.

8.6 Likes and Temporary Limits

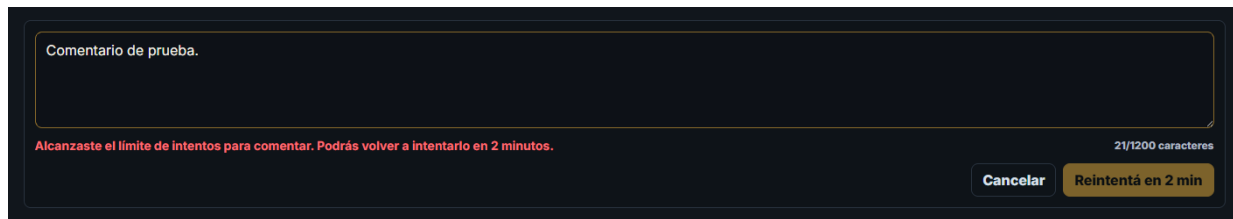

A registered account can add or remove a Like on other people's comments. Users cannot vote on their own content. The portal also temporarily limits certain actions to prevent excessive repetition.

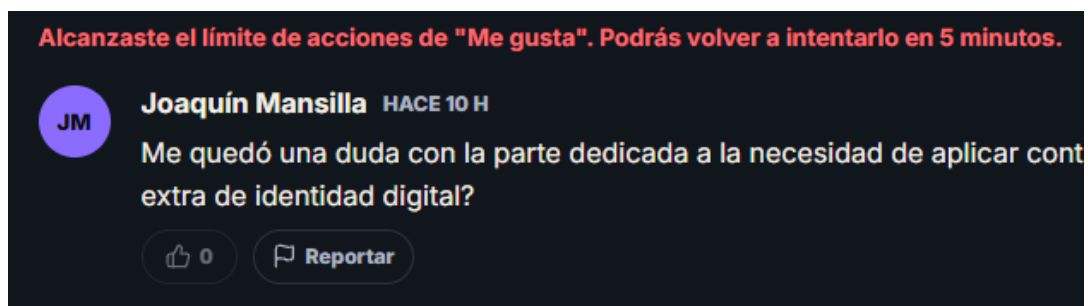

Before adding a Like.

After the Like is registered.

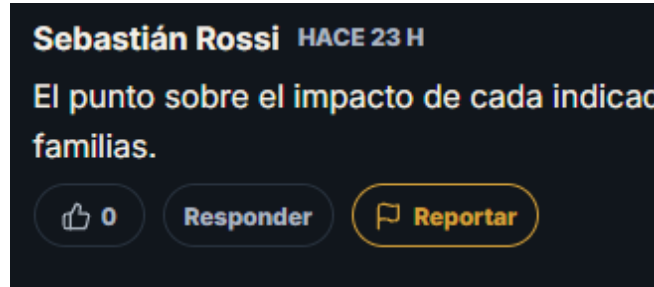

Message displayed when the temporary commenting limit is reached.

Temporary limit on Like actions.

8.7 Reporting a Comment

A registered account can report someone else's comment. Reporting does not automatically remove the content; it creates a case that can be reviewed by the editor.

Report action available on someone else's comment.

Window for selecting the reason for the report.

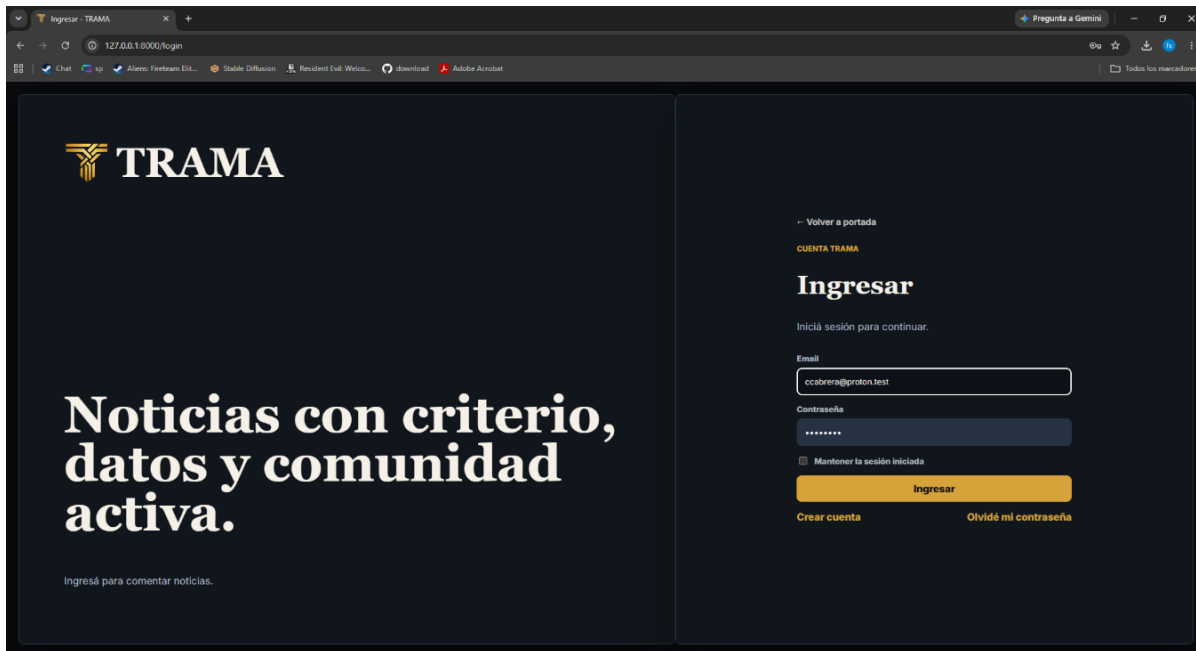

Comment marked as reported for that account.

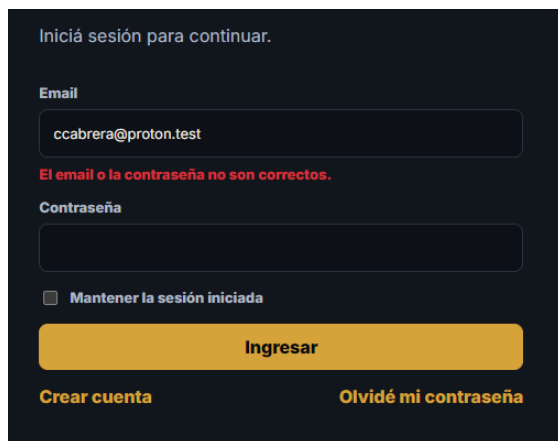

After reporting a comment, that account cannot start a new reply to the same content. If the user had already replied before submitting the report, the existing reply remains. Reporting and Liking are mutually exclusive actions for the same account: if the comment had that user's Like, TRAMA removes it when the report is saved and does not allow the user to Like it again while the comment remains reported by that account.

9. Account and Sign-In

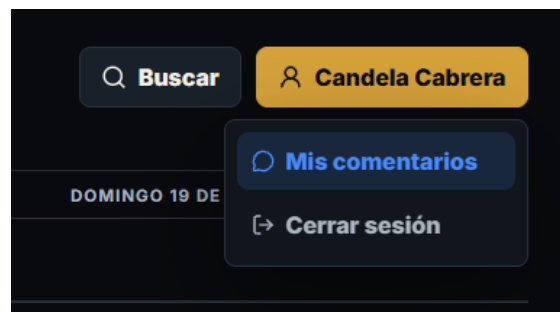

The Sign In button in the header opens the sign-in screen. From there, users can sign in, create an account, or request a password reset.

Public sign-in screen.

Example of incorrect credentials.

Menu available after signing in.

After a successful sign-in, the Sign In button displays the account name instead. The menu provides access to My Comments and the sign-out option. Team members authorized to work in the newsroom also have access to the editorial panel; that variation is shown later in the footer as well.

10. Registration and Email Verification

10.1 Creating an Account

Registration requires a name, email address, password, and password confirmation. If any value does not meet the requirements, a message appears next to the field that must be corrected.

The screenshot shows the TRAMA public registration interface. On the left, the TRAMA logo is displayed above the headline "Noticias con criterio, datos y comunidad activa." and a subtext "Ingresá para comentar noticias." On the right, the "Crear cuenta" (Create account) form is visible. It includes a link to "Volver a portada" (Return to homepage), the heading "CUENTA TRAMA", and the instruction "Creá tu cuenta para comentar noticias." The form contains four input fields: "Nombre" (Name) with the value "usuario_demo", "Email" with the value "usuario@ejemplo.com", "Contraseña" (Password) with masked characters, and "Confirmar contraseña" (Confirm password) with masked characters. A yellow "Crear cuenta" button is positioned below the fields, and a link "Ya tengo cuenta" (I already have an account) is located at the bottom right of the form area.

Public registration form.

This close-up shows the "Nombre" (Name) validation. The input field contains the text "11". Below the field, a red error message reads: "El nombre debe tener al menos 3 caracteres." (The name must have at least 3 characters).

Name validation.

This close-up shows the "Email" validation. The input field contains the text "usuario@ejemplo". Below the field, a red error message reads: "Ingresá un correo electrónico válido." (Enter a valid email address).

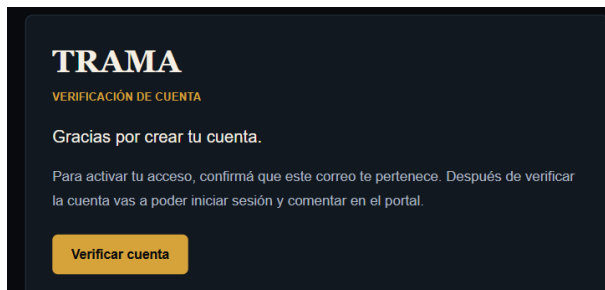

Email-address validation.

10.2 Verifying the Email Address

After the account is created, TRAMA reports that a verification email has been sent. The account must confirm that link before the user can sign in normally.

Confirmation displayed after creating the account.

Verification email.

Screen displayed after verification.

11. Password Reset

11.1 Requesting the Link

The Forgot My Password option lets users request a password-reset link. The screen displays the same type of message whether or not an account is associated with the email address, so it does not reveal which addresses are registered.

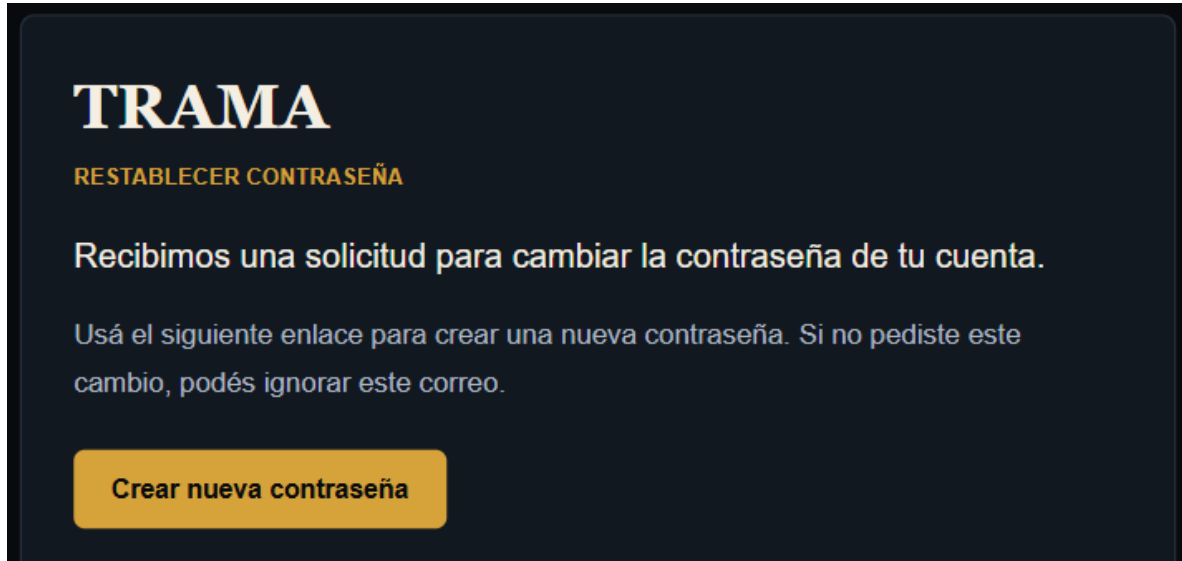

Screen for requesting a password reset.

Message displayed after requesting the link.

11.2 Setting a New Password

If an associated account exists, the user receives the email and opens the link. They then set a new password and return to the sign-in screen.

Password-reset email with the link for creating a new password.

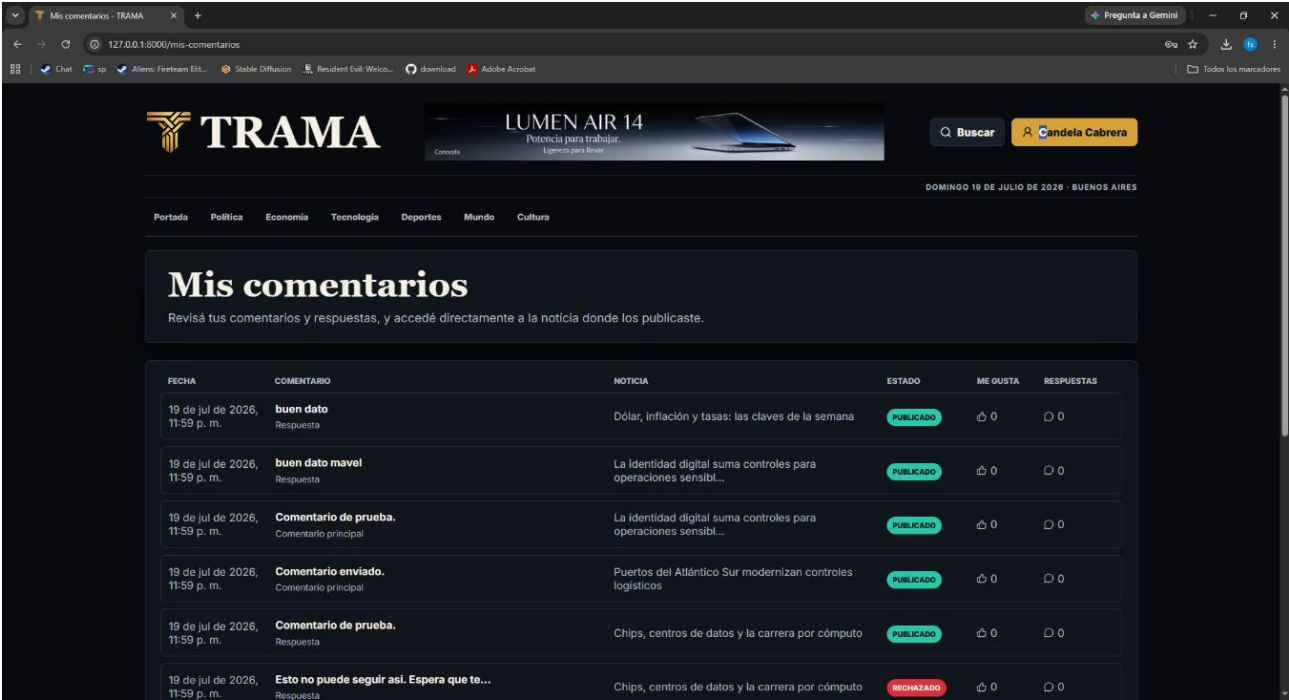

Screen for creating the new password.

Confirmation and return to the sign-in screen.

12. My Comments

A signed-in account can open My Comments from the user menu. The screen brings together the user's own comments and replies and makes it possible to review their status.

My Comments list.

How the List Is Organized

10 contributions are displayed per page, from newest to oldest.

Visible statuses can be Under Review, Pending, Published, and Rejected by Moderation.

Automatic rejections do not appear on this screen.

Opening a Contribution or Reviewing a Rejection

When a contribution is linked to an available public article, selecting it opens that article, scrolls the page to the comment or reply, and highlights it for a few seconds.

Luciano Nicolás Luna HACE 1 D

La forma en que la nota conecta el impacto de cada indicador sobre decisiones de cartera con el dato de inflación que puede mover expectativas me parece el corazón de la discusión.

Noticia: Chips, centros de datos y la carrera por cómputo · 19 de jul de 2026, 11:59 p. m.

Details of a contribution rejected by moderation.

13. Advertising

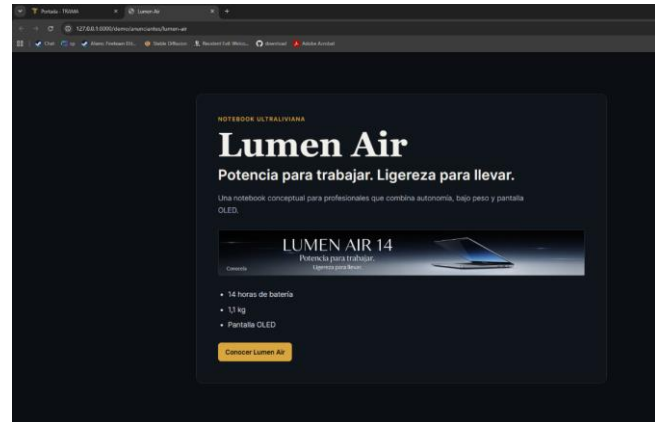

The portal uses a horizontal banner in the header and side advertising spaces within an article page. The top banner automatically rotates through different ads, displaying each one for a few seconds before moving to the next. Side ads remain fixed while the article is being read and may change when the page is reloaded.

Horizontal banner in the header.

Side banner within an article.

External destination after selecting an advertisement.

Selecting an advertisement opens the external destination configured for that campaign.

14. Footer and Informational Pages

14.1 Footer

The footer appears on public pages and provides links to portal sections, search, My Comments, and informational pages. A team member authorized to work in the newsroom also sees a link to the editorial panel.

Footer for a regular account.

Footer with access to the editorial panel.

14.2 About Us

About Us provides a brief description of the project, its approach, coverage, and mission.

About Us page.

14.3 Privacy and Terms

Privacy explains how information and content provided by users are handled. Terms sets out the general rules governing use, participation, and portal availability.

Privacy page.

Terms of Use page.

15. Contact

The Contact form lets users reach TRAMA about account issues, editorial inquiries, advertising, or other matters. The user selects a reason, enters their details, and writes the message.

The screenshot shows the TRAMA website's public contact form. The header includes the TRAMA logo, a banner for 'CAFÉ SENDA', and navigation links. The main content area features the title 'Contacto' and a subheading 'Escribinos por consultas editoriales, publicitarias o relacionadas con tu cuenta.' The form itself has a 'Motivo' dropdown menu with the option 'Problemas con mi cuenta' selected. Below this are input fields for 'Nombre' and 'Email', and a large text area for 'Mensaje'. A character count '0/1200 · faltan 15 caracteres' is visible. A yellow 'Enviar consulta' button is at the bottom right.

Public contact form.

This close-up shows the 'Motivo' dropdown menu. The selected option 'Problemas con mi cuenta' is highlighted in blue. Other visible options include 'Editorial', 'Publicidad', and 'Otro'.

Selecting the reason.

The screenshot shows the confirmation message after the inquiry was sent. A green banner at the top reads 'Recibimos tu consulta. El equipo de TRAMA la revisará.' Below this, the form fields are pre-filled with the user's previous input: 'Motivo' is 'Publicidad', 'Nombre' is 'Gaston', and 'Email' is 'usuario@ejemplo.com'. The 'Mensaje' field contains the text: 'Hola, quisiera consultar por las opciones de publicidad disponibles en el sitio, formatos de banners, tarifas y condiciones de contratación. Gracias.' A yellow 'Consulta enviada' button is at the bottom right.

Confirmation after sending the inquiry.

If the user is already signed in, the form can use their account information to fill in the name and email fields. After submission, the page confirms that the inquiry was received.

16. Messages, Validation, and Special Cases

TRAMA uses visible messages to explain why an action cannot be completed or what state an operation is in, without exposing internal technical details.

- Invalid data: the message appears next to the field that must be corrected.
- Comment under review, pending, or rejected: the status is displayed within the conversation itself.
- Temporary limit: the interface indicates that the user must wait before repeating the action.
- Sign-in required: the user is directed to the sign-in screen when necessary.
- Database unavailable: a separate contingency page is displayed.

Database temporarily unavailable.

Attempt to access a private area without a valid session.

Purpose of These Messages

The user receives a useful explanation so they can continue, correct the data, or try again.

The public interface avoids displaying queries, server paths, exceptions, or other internal information.
